

Introduction

Welcome to the WingArc Australia customer documentation for SuperSTAR 9.9

Where Do I Start?

New to the SuperSTAR suite? Start here: [Overview - SuperSTAR](#)

Interested in Upgrading from an Earlier Release? [Read what's new in version 9.9](#)

Need help using our Online Documentation? [Click here](#)

SuperSTAR is a suite of software products for public dissemination of statistical data.

> [Learn more...](#)

SuperSERVER

SuperSERVER is the core of the SuperSTAR system.

It is a common platform and database format for all the clients, offering consistent privacy protection and access control, integrated metadata and fast tabulations across microdata.

> [Learn more...](#)

SuperWEB2™

SuperWEB2 is a browser based data analysis client for SuperSTAR. Users can create tables using just a web browser, and visualise the results with charts and thematic maps.

> [Learn more...](#)

SuperCROSS

SuperCROSS is the desktop client for the SuperSTAR platform. It has a powerful and intuitive drag-and-drop graphical interface that facilitates fast, flexible tabulation and analytics for information producers.

> [Learn more...](#)

SuperCHANNEL

SuperCHANNEL is the database import tool you will use for converting your data from the source database to the star-schema, column-oriented format used by SuperSTAR to provide its cross-tabulation speed.
